Reviews

This ebook will not be effortless to get going on studying but very enjoyable to learn. Of course, it can be play, still an amazing and interesting literature. Your daily life period will probably be enhance once you complete looking at this book.

Book Condition: New. Publisher/Verlag: Springer, Berlin | Interest in and emphasis upon different aspects of the sphingolipids have, in general, followed the biochemical developments of the day. The early investigators were preoccupied principally with the isolation of "pure" compounds and structural elucidation. This historical perspective is found in the discussion presented in Chapter 1 (Section 1.1.2 and Table III). Still, the isolation and structural characterization of glycolipids are the basic foundation of all our knowledge of enzymology, immunology, and cell biology. Recent information obtained on structure has greatly affected the interpretation of various phenomena related to glycolipids. New structures suggest a new role of glycolipids as antigens and receptors. Ten years ago, only four neutral glycolipids and two gangliosides were known in human erythrocytes. We now know structures of at least twenty additional neutral glycolipids and ten additional gangliosides in human erythrocytes that are known to be important blood group, heterophil, and autoantigens. Erythrocytes are only one example of a cell type whose glycolipid profile has been extensively studied. Our defective knowledge in immunology and cell biology may be due to incomplete understanding of structural chemistry. Modern methodology based on methylation analysis, mass spectrometry, and enzymatic degradation has supplemented classical analysis based on colorimetry. Nuclear magnetic resonance spectroscopy is still in the development stage, but will eventually replace various chemical analyses. However, important future studies should be directed toward elucidating the organizational structure of glycolipids in membranes. | 1 Chemistry of Glycosphingolipids.- 1.1. Introduction.- 1.1.1. Classification and Nomenclature of Glycosphingolipids.- 1.1.2. Brief History of the Chemistry of Glycosphingolipids.- 1.2. Isolation of Glycosphingolipids.- 1.2.1. Extraction.- 1.2.2. Purification of Lipid Extract: Elimination of Nonlipid Contaminants.- 1.2.3. Separation of Gangliosides and Long-Chain Neutral Glycolipids.- 1.2.4. Separation of Individual Glycolipids.- 1.3.
