

The Battered Woman Syndrome: Perspectives in Criminal Law and Clinical Psychology (Paperback)

Filesize: 9.07 MB

Reviews

This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.

THE BATTERED WOMAN SYNDROME: PERSPECTIVES IN CRIMINAL LAW AND CLINICAL PSYCHOLOGY (PAPERBACK)

Createspace, United States, 2014. Paperback. Book Condition: New. 254 x 203 mm. Language: English . Brand New Book ***** Print on Demand *****.Testimony on battered woman syndrome (BWS), as a widely used self-defense strategy, has been accepted in all state courts of America. However, courts often hold that expert testimony on the BWS is inadmissible in a presented evidence where (1) it is irrelevant and immaterial to the issue of whether defendant acted in self-defense at the time of the battery; (2) the subject of the expert testimony isn t within the understanding of the jury; (3) the BWS is not sufficiently developed as an accepted scientific knowledge to warrant testimony under the guise of expertise; and (4) its prejudicial impact outweighs its probative value. For the first time in the legal scholarship, an attempt was made to use the Grounded Theory Model to analyze narratives and facts of twelve court holdings on BWS, to reach a facile consistency in defendants sworn-in motivations on reasonableness and imminence of danger that made them kill their spouses in self-defense, also to find correlations between the expert testimonies of BWS, counts of charges, and the verdicts or dispositions rendered. Through inductive coding of the case narratives and expert testimonies, we then applied the Mantel-Haenszel method to produce pooled odds ratio of the codes. Kruskal-Wallis statistic was used for the ranked ordinal data; Poisson regression was used for prediction analysis as to the influence of narratives and expert testimonies (continuous variables) on the adjudications (dichotomous variable); Pearson linear correlations were used to find associations between the numerical variables - coded narratives and length of the sentence in prison. Findings suggest that expert testimony of BWS is admitted in 58.3 of the holdings. In 14.3 of hearings, the conviction is shifted from murder to manslaughter....
