Excerpt: .In its solid state arsenous acid may be known by the following properties: 1. Heated on platinum foil or on the point of a penknife, it produces a white odorless smoke, and is entirely volatilized. If thrown upon red-hot charcoal, the characteristic garlicky odor will be perceived. 2. If some of the powder be heated in a small test-tube, it will be sublimed, and small octahedral crystals, visible to the naked eye, or by lens, settle on the sides of the test-tube. 3. If arsenous acid be mixed with freshly burnt powdered charcoal, and heated in a small test-tube, a ring of shining metallic arsenic of a gray color will be found on the cool portion of the tube, and an odor of garlic is perceptible. If this deposit be driven lng paper or tow (if that has been used), and all into a...
