

Geological Survey Professional Paper Volume 1047 (Paperback)

By Geological Survey

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: . the Carrara Formation, which attests to the rarity of this genus in the southern Great Basin. One of the specimens is an immature form (pl. 5, fig. 11) that is distorted but shows a strongly expanded glabella and moderately distinct posterior glabellar furrows. This does not resemble any other Cordilleran representatives of the genus, but it is too small to adequately compare with other forms. The other specimen (pl. 5, fig. 10) is very similar to *Bonnia columbensis* Resser in all cranial proportions. However, it has extremely faint bertillon markings on the glabella and lacks any distinct granules which are said by Fritz (1972, p. 33) to characterize this species. In the absence of associated parts, an adequate specific designation cannot be given. Occurrence.--Very rare (2 cranidia), Bristolia Zonule and Gold Ace Limestone Member. California: 7181-CO, Cucomungo Canyon section, Last Chance Range. Nevada: 3646-CO, Nevada Test...
