

Sustainable Nutrient Treatment from Wastewater Using FBR-MBR Systems

Filesize: 2.24 MB

Reviews

The book is fantastic and great. It generally does not expense excessive. Its been designed in an exceptionally easy way and it is simply right after i finished reading through this book by which really changed me, change the way i think.

(Adolfo Lindgren)

SUSTAINABLE NUTRIENT TREATMENT FROM WASTEWATER USING FBR-MBR SYSTEMS

To get **Sustainable Nutrient Treatment from Wastewater Using FBR-MBR Systems** eBook, make sure you refer to the link beneath and download the document or have access to additional information that are have conjunction with **SUSTAINABLE NUTRIENT TREATMENT FROM WASTEWATER USING FBR-MBR SYSTEMS** ebook.

LAP Lambert Academic Publishing Jun 2014, 2014. Taschenbuch. Book Condition: Neu. 220x150x10 mm. This item is printed on demand - Print on Demand Neuware - Human activities, particularly agriculture and urbanization, have led to increased nitrogen and phosphorus discharge to inland water systems. This condition leads nutrient enrichment which causes eutrophication. Eutrophication can profoundly alter the structure and function of aquatic ecosystems, potentially endangering human health, biodiversity and ecosystem sustainability. Moreover, phosphorus which is vital for life and fertilizer industry will be exhausted shortly in the near future and become a major challenge for the global society. Therefore, both nitrogen and phosphorus in wastewater should be properly treated before discharged to the water environment. In general, this book was designed for sustainable nutrient recovery and removal from wastewater using a novel Fluidized Bed Reactor-Membrane Bioreactor (FBR-MBR) combo system. The specific objectives focus on developing FBR that efficiently recover phosphorus as struvite at low and high phosphorus concentration, combing the FBR system with MBR system targeting nitrogen and COD removals. 164 pp. Englisch.
